Genre: Turn Based Strategy (TBS), Strategy Rankings: PEGI 18, ESRB M First Release (Each Platform): XCOM: Enemy Inside An Expansion Pack for XCOM: Unknown Enemy, Turn-Based Tactical Strategy Game. The expansion adds the ability to gene mod soldiers to add to their powers as well as the ability to create MECs, powerful robotic soldiers. The enemy computer version is unknown within the add-on that requires playing the enemy base. We also have a page for this game in.... Ask questions/get help here are the top 10 tips/tricks/cheats you need to know for XCOM: Enemy Inside!1. Get the depth of the bench• Relying on proven soldiers is good, but at some point your team will be out for injury, and Trevor’s mission is going to break down, and his available soldiers are going to be recruited on their knees. Focus on bringing novices into routine fights like falling mop-ups and kidnapping missions so they have the necessary experience. If anything happens to your best soldiers, you’ll be waiting for them in the wings.2 Satellites, satellites, orbital coverage satellites are critical to victory. Focus on capturing satellites, prioritizing engineer grant missions early in the game.3. Remember South America• With only two countries requiring satellite coverage in order to unlock continental rewards, consider placing their initial base in North America or Asia, and putting their first two satellites over South America. Immediate autopsies and interrogations give you the fastest access to the Mods gene and Foundry projects, giving your scientists critical time to focus on research gear and priority research projects.4. Invest your Meld• Meld is a valuable resource, but it’s not hoarding! You will have plenty of opportunities to get it through the game. Don’t be afraid to invest early in Gene Mods or become MEC Trooper.5. Special Agent, do you have an extra sniper? Consider using him as a proprietary secret agent. Build a soldier with the skills of Themanche, give him the best temanche in the armory, and invest in a few Gene Mods, and his agent will be more than able to help the extraction team. Page 2 • Beat your EXALT mission with EXALT attack weapons or EXALT laser weapons bonus. Function identically with conventional weapons and lasers used by XCOM, they are still excellent looking and you can equip your soldiers with them. Sometimes a council nation ask for a few of these, and you can draw a very handy mass of credits in that case. 7. Checking your pocket • Deep pockets is no longer For support soldiers! It is now a Foundry research project, and gives a second item slot to all XCOM soldiers. More grenades, more fun. 8. Whizbang Flashbang • Flashbang grenades stun their targets for two innings, giving them significant purpose and punishing movement. This also makes them easier to get down by throwing arches! Stunning targets for interrogation also give you the equipment they carry - potentially lace you valuable plasma weapons and alien grenades. 9. Gun training • Novices sometimes have trouble targeting, especially big and scary ones. Help late-game novices by giving them light plasma guns (found in thin, foreign men) and amplitudes. Stacking kick bonuses will really help rack the experience. 10. Escape! • [The game] at some point, you’ll be asked to go to St. John’s, Newfoundland. you want to find a ship . The ship will be full of crysides and you have to make a bacon and run away bringing support with Sprinter to push the button - they’re the only character with the speed needed to get to safety and out of reach of the unstoppable wave of Cryssalids (no, seriously, don’t try to stop them, they’re just going to spawn endlessly). Two snipers in Overwatch covering their support are also recommended. As he’s running, quickly, when that button is pushed. I know of the names of super cheat soldiers but I am looking for a way to get more money in the game. Even if the editing files are on Android.
